

OLIN SCOPE 2015-16

SPACE X OPTIMIZATION OF DEVELOPMENT TESTING

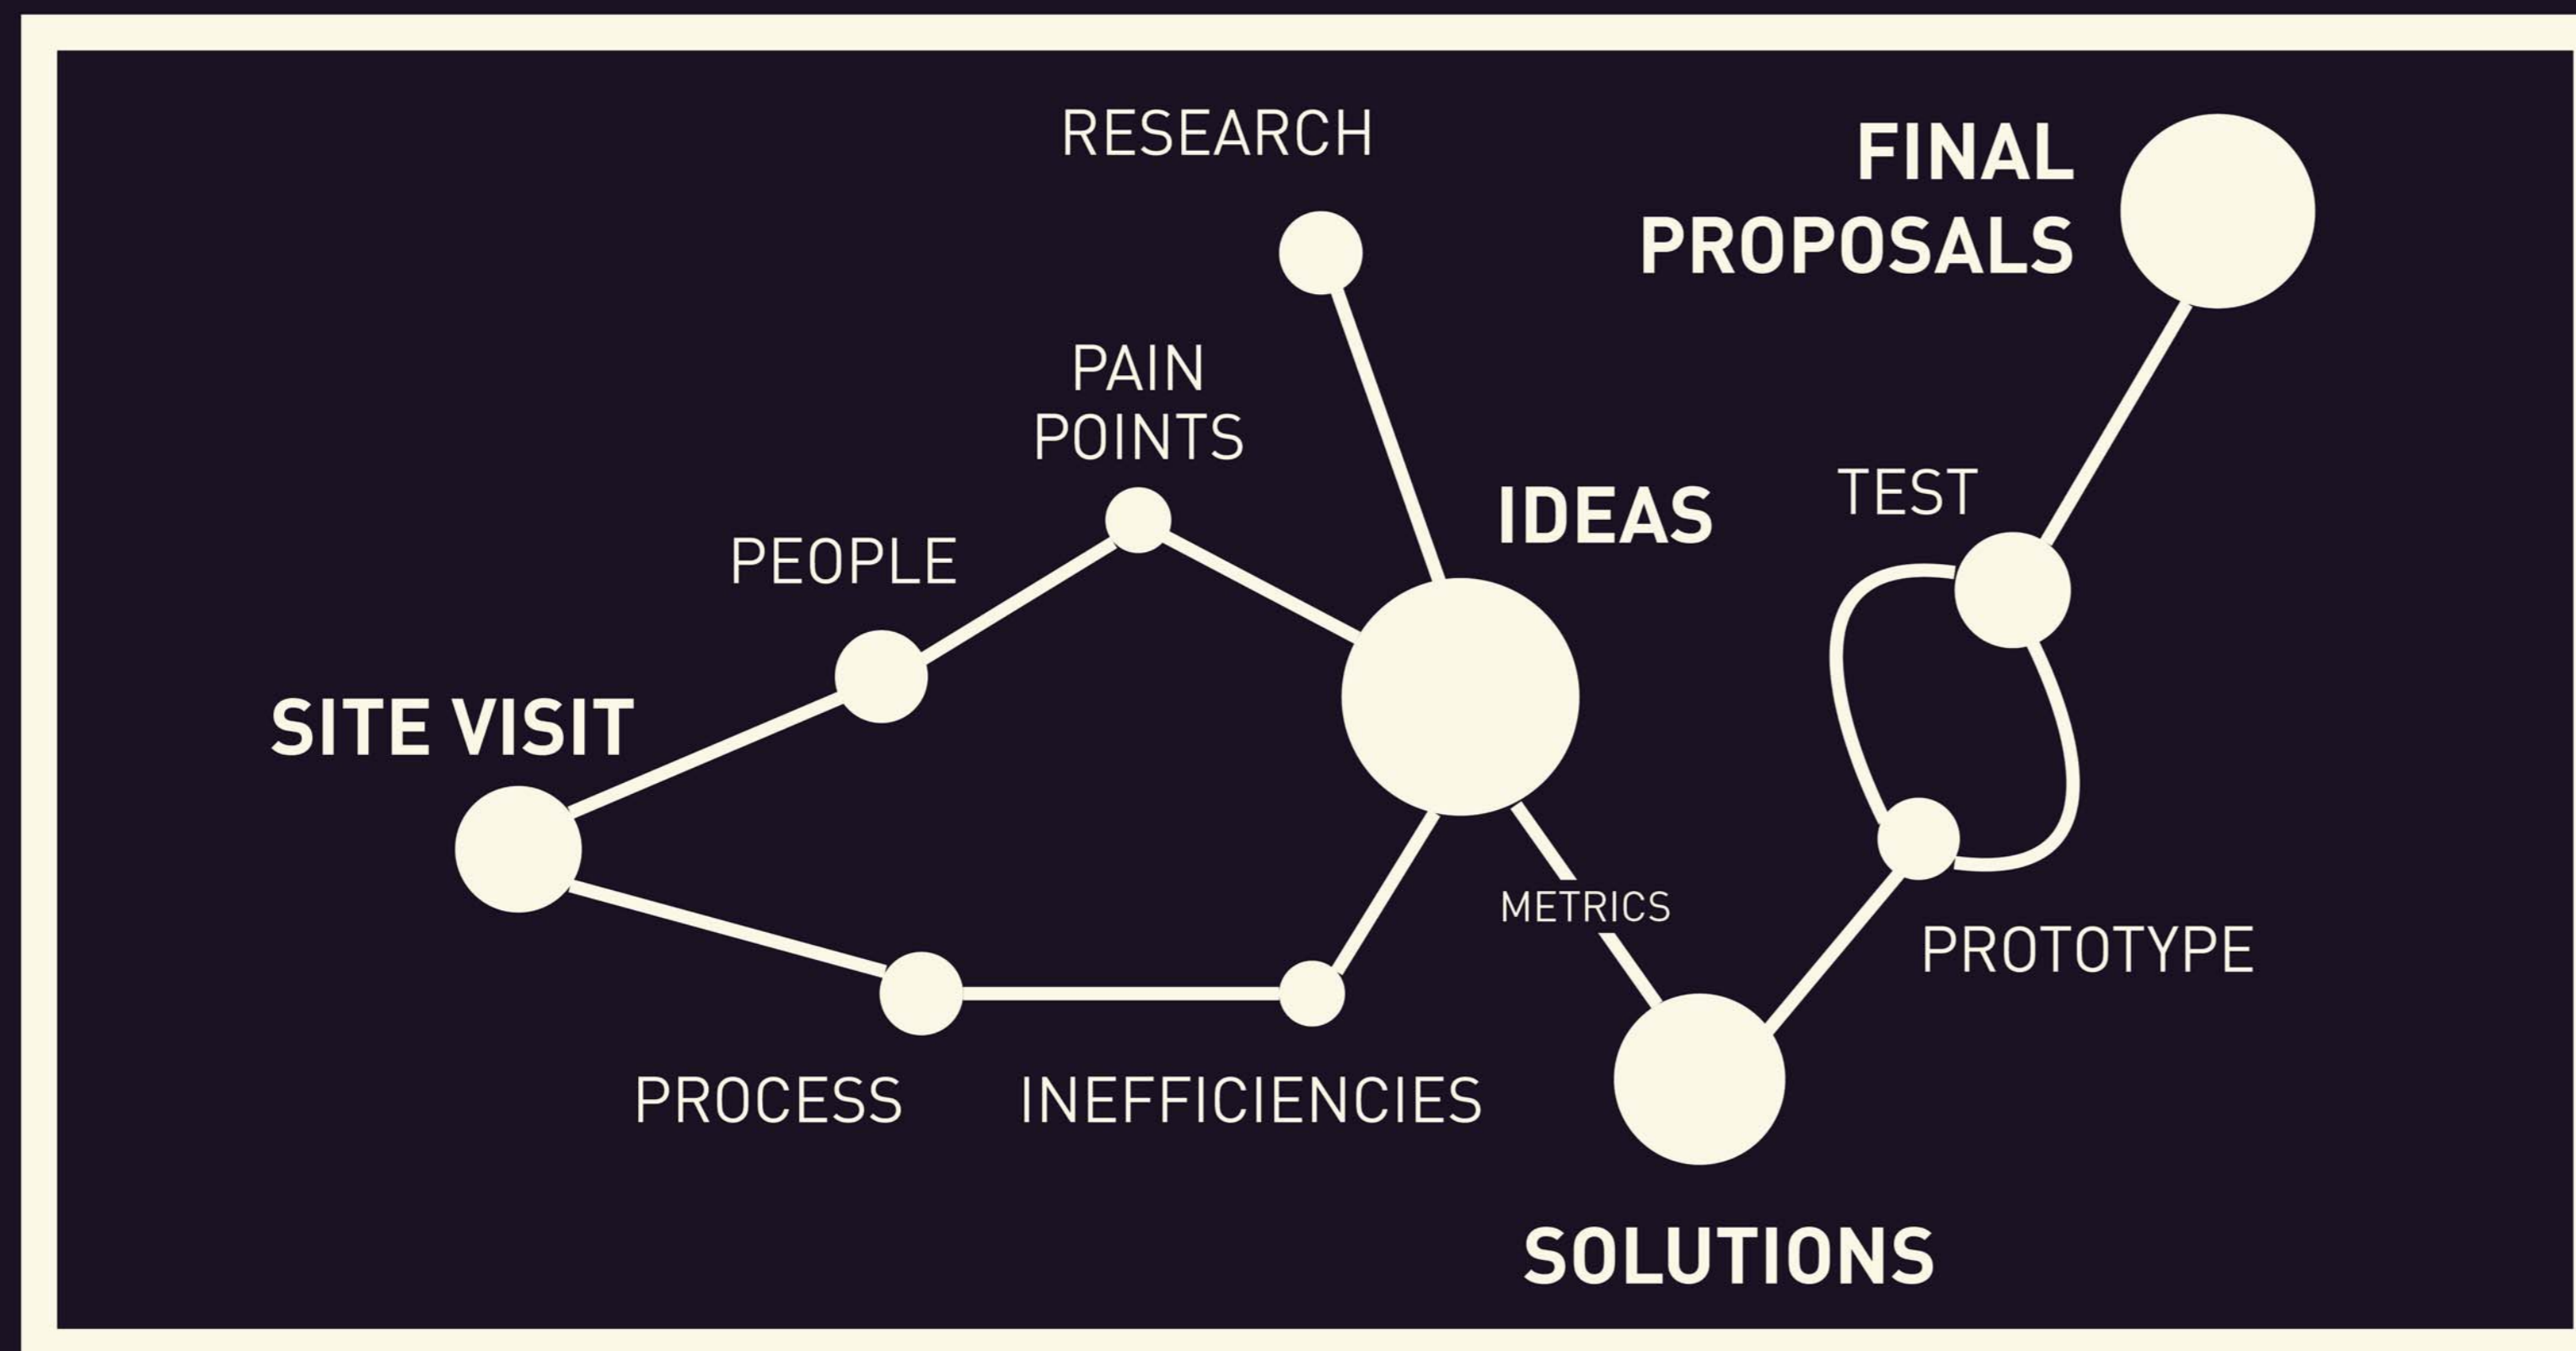

ABOUT THE PROJECT

Our team worked with the Development Test Team at SpaceX to optimize their processes with phases that included user testing and prototyping. The Development Test Team works with flight hardware for the Falcon 9 and Falcon 9 Heavy launch vehicles.

OUR PROCESS

We went through a design and prototyping process that was informed by observations and interviews to develop final proposals for process improvements.

FINAL PROPOSALS

We presented a few prototyped and tested solutions that we believe improves the development testing process at SpaceX.
