Join us for the ADE Social Impact Showcase in person!
**Tuesday, December 13, at 4:00-5:45 PM** (Boston time)

In person in Room 103, Weissman Foundry, Babson College
9 Map Hill Drive, Wellesley, MA 02482
Parking is free in the Trim lot right across the street

[RSVP here](#).

Affordable Design and Entrepreneurship (ADE) students from Babson, Olin, and Wellesley will share how they are collaborating with community members and partners to reduce burden, expand education, improve health, ensure rights, and generate income (more info below).

After the teams give 5-min summary presentations, we will have an interactive poster session to engage directly with students!

Come engage students grappling with pervasive social challenges like civil rights, environmental justice, economic mobility, food security, and structural inequality, around what they are working on and how they are working.

**NOTE:** This is a mask friendly event. We encourage guests to wear a mask indoors at all times. We ask that guests who feel sick or who are experiencing any symptoms of COVID-19 not come to campus. Please read the [guidance for visitors to Babson's campus](#).

[RSVP](#) to join us in person on Tuesday, December 13, at 4:00 PM at the Babson Foundry!
ADE SOCIAL IMPACT INITIATIVES
Through ADE, students engage collaboratively with communities and partners to reduce burden, expand education, improve health, ensure rights, and generate income. Teams engage, propose, prototype, test, and refine using the normative principles, methods, and tools of their track's change-making practice in ethical ways, be it community organizing, public policy advocacy, social venturing, etc.

AIR QUALITY - Reducing the burden of air pollution in near-source communities by building awareness and capacity for agency. - Roxbury

COMMUNITY DEVELOPMENT - Working with local educators to create equitable access to hands-on learning opportunities for 9-15 year-olds that build self-confidence, invite creative self-expression, and inspire community action. The long-term goal is to catalyze cycles of success that begin to disrupt the structural exclusion that has defined the region for twelve generations. - Mississippi

FOOD PROCESSING - Creating mini post-harvest processing machines accessible to women to reduce gender inequality, increase local food security, reduce burden, and grow small businesses. - Ashanti, Ghana

GLOBAL HEALTH - Increasing early access to hearing screening devices to enhance immediate well-being of children and improve their overall life outcomes. - virtual codesign with communities in Latin America

RIGHTS AND PRIVACY - Helping public defenders suppress evidence obtained through racial discrimination by finding racial disparity in discretionary policing data, and supporting community efforts to diminish policepower. - Massachusetts
