

# SHARE MEALS, MAKE FRIENDS

CREATING COMMUNITIES IN THE GOLDEN YEARS

CoCo is a set of integrated smart devices that empowers you to share moments with your loved ones in your kitchen and theirs. With CoCo, you will grow and share your cooking skills.

## COOK WITH LOVED ONES

A user and a loved one can use CoCo to cook together over video chat.

**Teach/Learn:** One person guides the other through a recipe the teacher knows well.

**Learn Together:** A user uploads a new recipe and cooks it across-kitchens with their family and friends.

## COOKING CLASSES

A user can use CoCo to join live cooking classes.

**Cooking Classes:** A user can participate in live classes, where they can interact with other students and ask the chef for feedback. Users can also watch recorded classes.

**Tutorials:** A user can play tutorial games to improve their cooking skills.

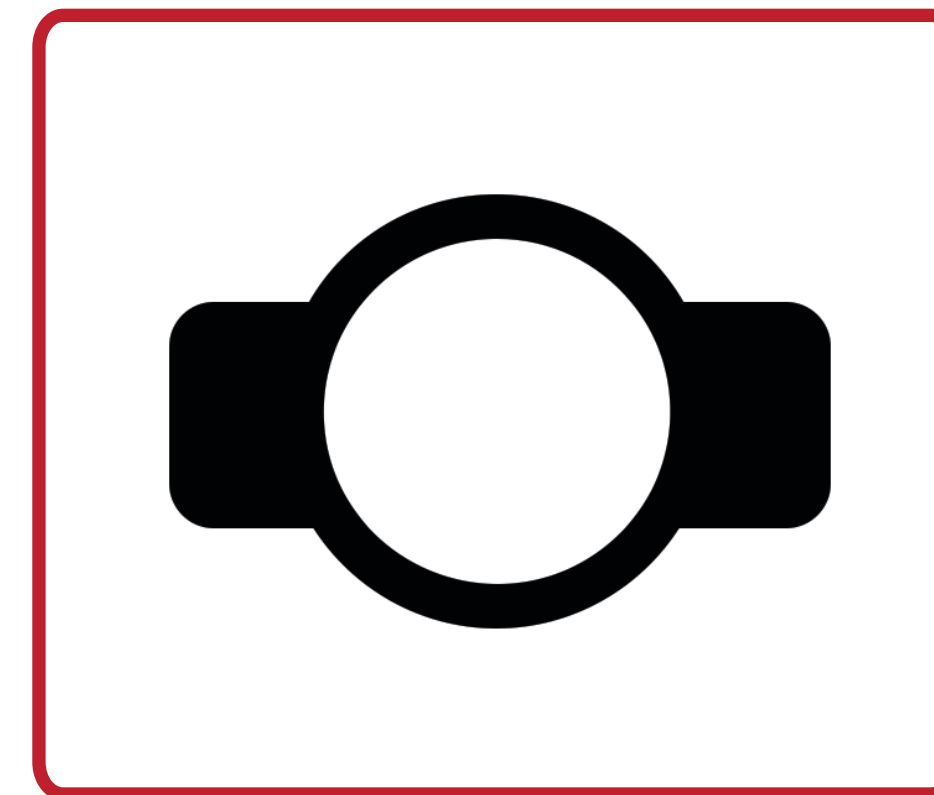

## KITCHEN OF THE FUTURE

In the future, kitchens will be designed with CoCo in mind.

**Screen:** A user can use the screen to video chat with loved ones or follow along with cooking classes. They get visual and audio feedback through the screen.

**Camera:** A user can show their loved one what their food looks like to get tailored feedback.

## HAPTIC WRISTBAND

A user wears one or two thin wristbands.

**Wristbands:** The wristbands track the user's motions and compare the user's motions with the motions of a chef, tutorial, or loved ones to determine precise feedback.

**Feedback:** Audio, visual, and haptic feedback are customized to the user's preferences and needs.

## OUR PROCESS

We followed a user-centered design process to learn about user needs. From there, we came to the following conclusion: in order for our product to be most effective, it must help older adults maintain purpose and agency in life. It can do this by addressing any of the six areas of opportunity shown below. Using this framework, we developed several products and moved forward with CoCo. We presented CoCo at SXSW in March 2018, where we got feedback on features to improve upon. The rest of the year was dedicated to identifying areas for improvement for Mitsubishi Electric as they continue this project in the future.

Know the impact of your actions

Adapt the world to your needs

Challenge yourself to keep

Think about the hard decisions now

Make post-retirement options available

Keep you and the world interesting

## OUR GOAL

CoCo is designed to help people in transition to feel empowered in the kitchen, connect with loved ones, and grow their cooking skills.

## OUR TEAM
